All products are USDA inspected and approved, 100% natural, flash-frozen and vacuum sealed to preserve freshness. All boxes are roughly 3 to 3.5 lbs of edible portions, the box of burgers being 6 lbs (12 - ½ lb patties).

WHAT'S THE ACTUAL COST?

Published reports indicate that most shoppers believe that the actual cost per pound reflects the true value of steak. Reports from the U.S. Department of Agriculture suggest otherwise.

The key word here is "EAT!" The real cost of beef is the cost per edible serving. The fat and bone that is trimmed before cooking or left on the plate may be part of the total cost of the beef, but the best indicator of eating value per dollar is cost per edible portion.
